CSC 204 Lab 10: Debugging

Goals
After doing this lab, you should be able to:
• use the Eclipse debugger to run a program, resume it, and view variables
• find errors in a program using the debugger

Lab Preparation
Read through this lab. Read the material in Sections 6.6 and 6.7 (this is the same in both the Big Java and Java Concepts books)

Materials Needed
Be sure you have the following on hand during the lab.
• This sheet and your course notebook.

Method
Copy the Lab 10 files from the class website (http://theochem.mercer.edu/csc204)

Part 1
Work through the example in section 6.7.

Part 2
Using the debugger, fix the loops in the program VeryUglyCode so that all the loops will terminate.

Deliverables
Send me your corrected version of VeryUglyCode.
